RESEARCH EXPERIENCE

Graduate Researcher September 2017 - September 2020

Title: "Research Report On Stalkerware Prevention Techniques" (September 2020)

- Carried out a researched on the negative impact of stalkerware, being a serious problem which can cause a huge privacy breach for its victims, intimate partner violence, abuse, and harassment often involves abusers/stalkers targeting and systematically and abusively intruding into the public and private lives of their current or former partners or whosoever they want to monitor secretly, which most times is unknown to the person that is being monitored.
- Identified preventive measure that can be applied on different smart devices such as Android Smartphones, iPhones, iPads. Not only smart devices are being attacked by stalkerware, likewise, PCs, Apple Systems can also be attacked. Hence, prevention measures can be applied on them too. There are few prevention techniques presently to prevent the attack and operations on one's devices. The major prevention measure found the use of antivirus with the functionality to tackle stalkerware; a very popular antivirus that has been in use as a measure to prevent the activities of stalkerware is the Kaspersky antivirus.
